#### **476 BBC support for victims of harassment and stalking**

Tabled: **19/10/22** Signatories: **1**

**Mr Barry Sheerman**

That this House recognises the immense suffering caused by Alex Belfield to his victims; condemns the grievous abuse of social media by the perpetrator who repeatedly exposed his victims to hatred, intimidation and harassment online; reiterates the comments of Justice Saini that the women who gave witness acted with substantial courage and real fortitude in coming to court about matters that had a very substantial negative mental health impact on them; reflects on the ruinous physical and mental impact that this campaign of targeted stalking and harassment has had on victims with them attaining little to no support from the BBC; is concerned that the help victims received from the BBC was remote, unconcerned and without sympathy; believes that there must be an urgent reflection to identify the mistakes that were made; therefore calls on the BBC to commission an independent inquiry into the handling of this case and treatment of all staff who have been harassed.

#### **477 County lines and child criminal exploitation**

Tabled: **19/10/22** Signatories: **1**

**Helen Morgan**

That this House is alarmed at the expansion of county lines networks, recently exacerbated by covid-19; calls for clarification of laws to ensure that all young people who are groomed, coerced and controlled into committing crime are recognised as victims of trafficking and exploitation; advocates the adoption of a new public health approach to drug prevention that works with schools, pupil referral units and providers for those outside of mainstream education; notes the need for new local safeguarding partnerships enabling multi-agency work to identify and respond to child criminal exploitation; further notes that a system is required for seamlessly sharing data across borders and agencies and disrupting grooming and criminality that has migrated from the

streets to encrypted apps; and calls upon the Government to introduce a stand-alone national strategy on child criminal exploitation that includes these recommendations as a matter of urgency.

#### **478 Global hunger and the UN Sustainable Development Goals**

Tabled: **19/10/22** Signatories: **1**

**Tony Lloyd**

That this House believes the lack of attention paid to global hunger has exacerbated this long-term and widespread issue; is concerned by warnings from the World Food Programme (WFP) of another year of record hunger; notes the number of hungry people globally increased from 282 million to 345 million during 2022; highlights that a fifth of the total population of Africa went hungry in 2021; further highlights that the WFP is currently holding back famine in Afghanistan, Ethiopia, Somalia, South Sudan and Yemen while hunger in Haiti is also reaching catastrophic levels; notes that Oxfam says food shortages are likely to cause one death every 36 seconds until the end of the year; further notes that hunger displaces millions of people who must search for sanctuary elsewhere; emphasises that these crises are caused by a combination of global factors including climate change, conflict and economic instability; recognises that the covid-19 pandemic led to an increased gap in the funding required to tackle global hunger; is dismayed that the world is set to fail the UN Sustainable Development Goal of Zero Hunger by 2030, with the percentage of the global population affected by hunger on track to reach almost 10 per cent by that year; highlights that a senior Somali Government official recently said the UK has lost its leading role on this issue; and calls on the Government to re-establish the UK as a leading actor by restoring the commitment to spending 0.7 per cent of GNI on international aid.

That this House welcomes Reduced to breaking point, the MS Society report on the cost of living for people with MS; is alarmed by the findings that 33 per cent. of people with MS are either struggling or really struggling on their current income; is concerned that three in ten of those suffering with MS who were surveyed have necessarily reduced their spending by reducing or stopping treatments and therapies; notes the need to provide an appropriate cost of living package which supports disabled people on means-tested income replacement benefits and non-means tested extra costs benefits; and supports the suggestion that the UK Government commits to raising benefits at least in line with inflation.

That this House welcomes the positive interventions from many Members across the House on behalf of women born in the 1950s who have lost their pensions; pays tribute to constituents and campaigners in their ongoing fight for justice; notes that at least 3.8 million women have been impacted by the loss of their pensions from the age of 60 in three separate age hikes; recalls that 1950s born women were subject to discriminatory employment and pension laws; recognises that this included being excluded from some pensions schemes; further recognises that this had the negative effect for them of losing the opportunity to have the same level of pension as their partner or spouse; recognises that this has had the consequence of women in this position never being able to have equal pensions to men; puts on record that, combined, these measures have had a negative and profound impact for millions of women; recognises that this loss of income, coupled with the current dramatic rise in inflation and cost of fuel, food, essentials and bills, has exasperated already increased levels of poverty, deteriorating health and homelessness; further notes that pension age hikes mean that many are excluded from winter fuel and cost-of-living payments; and calls on the Government to enact a temporary special measure as permitted by international law to provide full restitution to all women born in the 1950s who have lost their pensions from the age of 60 because of the impact of the rise in retirement age.

**Bob Blackman**  
**Carla Lockhart**  
**Jim Shannon**  
**Jonathan Edwards**  
**Christine Jardine**  
**Dan Jarvis**

That this House recognises the impact that the increase in fuel prices and motoring costs is having on those who rely on their cars and personal vehicles for carrying out their work duties, particularly those in the NHS, local government and social care; notes that the current mileage rates are outdated and require immediate and urgent review by HMRC to reflect the soaring cost-of-living increases so that these workers can continue to carry out their jobs; notes that low-paid public service workers cannot afford to upgrade their vehicles to new, fuel efficient options and that mileage rates for frontline workers should reflect that; understands that temporary higher rates provided by employers are welcome but do not provide enough relief; and calls on the Treasury to ensure rates are regularly updated in the future to genuinely reflect the cost of using a vehicle for work so that workers are protected from future fuel price spikes.

That this House expresses its concern about the Retained EU Law (Revocation and Reform) Bill which represents an unprecedented attack on nature which could have significant implications for Northern Ireland; notes that about 11 per cent of species in Northern Ireland are already at risk of extinction; believes that this proposed legislation would further weaken environmental and public health protections through the removal of hundreds of pieces of legislation; expresses concern about this Government's downward trajectory of deregulation, lower standards and environmental destruction; and urges the Government to stop the removal of important environmental and nature legislation.

**468 Location of the British Embassy in Israel**

Tabled: 17/10/22 Signatories: 4

**Layla Moran [R]**  
**Jonathan Edwards**  
**Chris Stephens**  
**Wendy Chamberlain**

That this House urges the Foreign Office to cease its review regarding the location of the British Embassy in Israel and commit to keeping the embassy in Tel Aviv; maintains that moving the British Embassy in Israel to Jerusalem without a negotiated peace settlement will inflame already heightened tensions in the region and will make peace harder to achieve; expresses its concern that the very act of a review is itself hugely inflammatory; notes that such a move would be a breach of international law; recalls how the decision by the United States to move their Embassy, under former President Trump, resulted in violent clashes which resulted in the deaths of around sixty people; and affirms its support for a two-state solution, in which Israel and Palestine both

exist with secure boundaries based on the 1967 lines with two capitals in Jerusalem recognised in international law.

Tabled: 18/10/22 Signatories: 3

Layla Moran  
Jonathan Edwards  
Wendy Chamberlain

That this House raises grave concerns following the 10 October 2022 report from the Bahrain Institute for Rights and Democracy and Human Rights Watch which documents a litany of human

rights violations against death row inmates in which recipients of UK taxpayer-funded Gulf Strategy Fund (GSF) programmes, including Bahrain's Ministry of Interior, Ministry of Interior Ombudsman and Special Investigations Unit, are implicated; is further concerned at evidence that Bahrain's courts have sentenced defendants to death following manifestly unfair trials, based on confessions allegedly coerced through torture and ill-treatment; decries that those courts dismissed credible allegations of torture and ill-treatment instead of investigating them and routinely violated defendants' rights to fair trials; highlights that persistent rights violations which contravene international law underlie the convictions and death sentences of cases of eight men, who are among 26 on death row in Bahrain at imminent risk of execution; expresses further concern that Bahrain's judiciary and oversight bodies implicated in perpetrating violations against torture victims sentenced to death benefit from UK taxpayer-funded programmes under the GSF, and did so at the time of their abuse; reiterates calls to suspend the GSF pending an independent inquiry into its programmes' implications in rights violations against death row inmates; urges the Government to implement this report's recommendations, publicly condemn the death sentences of Maher Abbas al-Khabbaz, Sayed Ahmed al-Abar, Zuhair Ebrahim Jasim Abdullah, Husain Ebrahim Ali Husain Marzooq, Husain Moosa, Mohamed Ramadhan, Husain Ali Mehdi and Salman Isa Ali Salman; and calls upon Bahrain to release them.
