■ Access to psilocybin treatments

Charlotte Nichols

Crispin Blunt

Ronnie Cowan

This House welcomes the development of treatment options in mental health; further notes there have been no new pharmacological treatments for depression, with the exception of Esketamine, in over 30 years; recognises that psilocybin, a naturally occurring compound, has the potential to revolutionise the treatment of many of the world's most hard to treat psychiatric conditions such as depression, PTSD, OCD, addiction and anorexia nervosa; recognises that no review of the evidence for psilocybin's current status under UK law has ever been conducted; regrets that psilocybin is currently more controlled than heroin under the most stringent class and schedule under UK law which is significantly stalling research; and calls on the Government to take steps to conduct an urgent review of the evidence for psilocybin's current status as Schedule 1 under the Misuse of Drugs Regulations 2001 with a view to rescheduling,

initially for research purposes only, in order to facilitate the development of new mental health treatments and enable human brain research for the benefit of researchers, patients and the life sciences sector in the UK, and to deliver His Majesty's Government's commitment to be world-leading in its approach, with evidence-led and data-driven interventions, and building the evidence base where necessary.
