Tabled: 11/09/23 Signatories: 1

1595 UK manufactures of Lower Carbon Construction vehicles

Tabled: 11/09/23 Signatories: 1

Mr Alistair Carmichael

This House welcomes the Government's decision to review the lower weight limits being imposed on greener volumetric mobile concrete plants (VCMs) as a first step to reversing regulations that are devastating a great British manufacturer, threatening 15,000 skilled jobs in 137 constituencies, contributing £380 million to the UK economy; further notes that VCMs operated legally at 38.4 tonnes and above for 50 years, producing concrete with zero waste and far fewer road miles than

old fashioned drum mixers, saving annually an estimated 14 million lorry-miles to UK roads, 598,000 lorry journeys, 120,000 tonnes of CO₂, preventing a 20% increase in CO₂, nitrogen oxide and particulates, and extra carbon costs of £7 million; further notes the 2017 report commissioned by Highways England endorsed 44 tonnes as a safe weight for 5 axle VCMs and 38.5 tonnes for VCMs on four axles; also notes that unless the Review reverses the decision to abolish 44 tonne VCMs in 2028, the sole UK VCM manufacturer in Sheffield will cease trading; further notes Denmark raised the weight limit from 32 tonnes to 38 tonnes and in Italy and Scandinavia 44 tonne VCMs are road-legal; recognises the UK concrete market is dominated by foreign-owned conglomerates running rival drum mixers at 32 tonnes; notes that the Government abolished the unrealistic 32 tonne weight limit for all-electric HGVs; further notes the Labour Opposition commitment to reverse this weight cut; and calls on Ministers to permit VCMs to run at higher weights too.

Chris Law
Ms Anum Qaisar
Douglas Chapman

Caroline Lucas

That this House notes with great concern that thousands of parents, mostly mothers, who took time out of work to care of their children have been underpaid their state pension as a result of maladministration by the Department for Work and Pensions which was first identified in July 2022; acknowledges that this error relates to those who claimed home responsibilities protection which was introduced in 1978 to protect state pensions of parents or carers before the introduction of national insurance credits in 2010; is concerned that this error is believed to be the second largest source of state pension errors after the underpayments scandal that has affected around 237,000 people, overwhelmingly women, who reached state pension age before April 2016; understands that this error arose because periods of home responsibilities protection were not recorded accurately resulting in those affected having fewer national insurance contributions credited to them and that those people have received a lower state pension as a result; is disappointed to learn that the DWP annual report and accounts 2022 to 2023 has warned that it could take until late 2024 before all those affected have this error corrected; and urges the UK Government to launch a public awareness campaign to ensure that all those potentially affected are alerted about how they can check their national insurance record and claim any missing home responsibilities protection credits so that they can claim the correct level of their rightful state pension as soon as possible.
