New EDMs

888 **Listed Places of Worship Grant Scheme in York**

Tabled: **4/03/25** Signatories: **1**

Rachael Maskell

That this House notes that from 1 April 2025 the Listed Places of Worship Grant Scheme will limit VAT relief to £25,000, with no further plans beyond 2026; further notes that while 94% of projects will be unaffected by these changes, it has generated significant challenges for projects which have already commenced such as The Belfrey, in York where its £10m project has now lost £1.5m of funding due to these changes at short notice, while the church has already removed the floor, the windows, stripped back the walls, and is removing the roof, leaving a ruin held together with scaffolding; believes that immediate remedy must be provided to support the few projects which are impacted by these changes, recognising that the places of worship impacted by this change have already signed contracts for works, and this will also impact on their social programmes to the city, their worshipers and their plans for the future; and therefore calls on the Government to work with those projects impacted to find a resolution to the loss in funds as a matter of urgency.

889 In memory of Jack VettrianoTabled: **4/03/25** Signatories: **1****Richard Baker**

That this House expresses its deepest condolences on the passing of Jack Vettriano OBE; recognises his remarkable journey from a self-taught artist in Levenmouth, Fife, to an internationally acclaimed painter whose prints of works, including *The Singing Butler*, have adorned countless homes worldwide; notes that his early inspiration came from the Kirkcaldy Galleries, where some of his earliest works were later exhibited; acknowledges his significant contribution to Scottish artistic life; celebrates his generous philanthropic work; and further recognises that his loss will be deeply felt across Scotland and beyond.

890 Impact of independent sector provision of cataract surgeryTabled: **4/03/25** Signatories: **1****Ian Byrne**

That this House notes the Centre for Health and the Public Interest's research showing that the percentage of NHS cataract procedures being carried out by the private for-profit sector increased from 24% in 2018-19 to 55% in 2022-23 and that the increase is likely to mean there are fewer resources available to treat other eye care conditions, such as glaucoma and wet macular degeneration, which are generally considered more serious and can lead to irreversible sight-loss; is concerned that in a survey by the Royal College of Ophthalmology 67% of clinical leads in NHS ophthalmology departments reported that the impact of independent sector provision on patient care has been negative, and that clinical leads were most likely to say the impact of independent sector providers on their ophthalmology department had been negative when it came to training opportunities, 73%, funding of their department, 58%, available workforce, 50%, and their ability to deliver comprehensive services, 48%; is further concerned that the use of the independent sector to deliver cataract procedures does not represent value for money in the light of the damage it is doing to the future of universal comprehensive NHS provision; is concerned too that senior clinicians have raised fears of NHS eye care deserts in the future, just as there are with dentistry, and that increasing numbers of people will lose their sight unnecessarily; and calls on the Government to carry out an urgent review of these matters.

891 Own Books and World Book DayTabled: **4/03/25** Signatories: **1****Manuela Perteghella**

Liz Saville Roberts

Ben Lake

Ann Davies

Llinos Medi

That this House calls on the Government to remove VAT on Automated External Defibrillators (AEDs); notes that the Scrap the Heart Restart Tax is a national campaign by the British Healthcare Trades Association which has drawn support from a range of aid and cardiovascular charities including St John Ambulance, the British Heart Foundation, and the British Red Cross; further notes that the proposal would increase the affordability of AEDs and save lives; highlights that early treatment can increase survival rates to as high as 70% if defibrillation is given within three to five minutes of collapse, but drops by 10% for every minute of delay after this time; argues that removing VAT from the sale of AEDs would make them significantly more affordable and bring costs down by up to £500; and further calls on the UK Government to adopt this proposal which would greatly increase the number of defibrillators in community centres, sports clubs and workplaces, and save lives in turn.

893 Ashby Netball Club

Tabled: **4/03/25** Signatories: **1**

Amanda Hack

That this House congratulates Ashby Netball Club for playing 75 hours of non-stop netball; notes that the players raised £54,000 for Kids Village which is a charity that provides respite holidays for children with critical illnesses; further congratulates the players on breaking two world records in the process; applauds them for setting an entirely new one; and recognises all the players involved for their remarkable achievement.

897 **Colleges Week 2025**

Tabled: **4/03/25** Signatories: **1**

Ian Sollom

That this House welcomes Colleges Week 2025 from 3-7 March 2025; celebrates the impact colleges have on local communities across the country in building brighter futures for their students and staff; and calls on the Government to address the persistent underfunding of further education colleges in the forthcoming Spending Review to ensure they can continue to deliver high-quality education and skills training that is vital for individual opportunity and national prosperity.

Calum Miller

Helen Maguire

Ellie Chowns

John McDonnell

Jim Shannon

Luke Akehurst

808 Cash acceptanceTabled: **24/02/25** Signatories: **23****Neil Duncan-Jordan****Jim Shannon****Richard Burgon****Apsana Begum****Ian Lavery****Margaret Mullane**

Ian Byrne

Sammy Wilson

That this House is concerned at the rapidly increasing trend for UK businesses, local authorities and leisure facilities, including those supported by taxpayer funding, to refuse to accept cash for payments; appreciates that this issue is of ever-increasing importance to the 16 million British adults who run their household budgets using cash, along with many of the 13 million UK citizens over 65 struggling to make ends-meet; recognises that the estimated 4 million people in the UK at risk in abusive relationships may use discretely saved cash as an escape route from abuse; deplores the fact that the imposition of app-only payment, including for car parking and other travel-related purchases, severely threatens the financial inclusion of the 8 million plus adults who do not own smart phones; notes that most of the UK's European neighbours, including Belgium, France, Denmark, the Netherlands, Norway and Spain, have already put cash acceptance legislation in place; understands that a recent survey by YouGov established that 71% of British adults want similar legal measures introduced in the UK; and calls on the Government to introduce legislation to require all businesses in the UK to accept cash for payment.

809 LGBTQI+ people in immigration detentionTabled: **24/02/25** Signatories: **14****Bell Ribeiro-Addy****Neil Duncan-Jordan****Richard Burgon****Shockat Adam****Apsana Begum****Ian Lavery**

Ian Byrne

That this House welcomes the ongoing review of the Home Office's Adults at risk in immigration detention policy; notes that LGBTQI+ people face heightened levels of harassment, discrimination, abuse, and physical and sexual violence in immigration detention; recognises that the bullying of and discrimination against LGBTQI+ people in detention can re-traumatise those who have fled persecution; believes that immigration detention is costly and punitive, and that cheaper and more humane alternatives to detention exist; further welcomes the community-based Alternative to Detention pilots undertaken by the Home Office and supports their wider expansion; calls on the Government to include being gay, lesbian, bisexual or

queer in the Adults at risk in immigration detention policies indicators of risk and to remove the categorisation of vulnerability based on evidence levels; and supports the greater use of community-based alternatives to detention.

Dye; further notes the massacre and the humiliations that followed are a deep stain and scar on British history; and calls on the Government to make a formal apology which would give some solace to the victims, their families and the people of the Indian subcontinent.

Mr Angus MacDonald

Wera Hobhouse

Edward Morello

Jim Shannon

Martin Wrigley

Helen Maguire

Tom Morrison

Graham Leadbitter

Lisa Smart

That this House acknowledges the severe disparity in energy costs between mains gas and electricity, which disproportionately affects rural communities and high rise buildings across the UK; notes that while renewable electricity is cheaper to generate, market structures result in electricity consumers paying significantly more than those using mains gas; further notes that many areas lack access to mains gas, forcing reliance on costly alternatives; highlights the Environmental and Social Obligation taxes that apply to electricity but not gas; and calls on the Government to decouple energy pricing to ensure fairer costs for all.

838 Energy price cap increaseTabled: **25/02/25** Signatories: **6****Shockat Adam****Jim Shannon****Ellie Chowns****Ben Lake****Rachael Maskell****Ayoub Khan**

That this House notes with concern the further increase of the energy price cap by Ofgem from April 2025; further notes at 6.4%, or an average £111 per year, this is higher than expected and higher than the rate of inflation and average pay increases; acknowledges the research by Citizens Advice which shows the energy network owners have made excess profits of nearly £4 billion over four years after Ofgem miscalculated their costs; and calls on the Government to step in to prevent these damaging rises, either through introducing an emergency windfall tax on these excess profits and the introduction of targeted energy bill support or by instructing Ofgem to ensure they put the protection of consumer interests first and reverse the price cap rises and pass the costs onto the owners of the energy network.

Llinos Medi

Liz Saville Roberts

Ann Davies

That this House expresses concern over the Government's decision to reduce the UK's Official Development Assistance (ODA) from 0.5% to 0.3% of Gross National Income (GNI); agrees with the importance of strengthening the UK's national security and defence commitments, particularly in light of increasing global security challenges, but recognises that a cut to ODA diminishes the UK's soft power; regrets that the UK's retreat from its status as an international aid superpower creates a vacuum into which Russian and Chinese influence will flow; acknowledges the intimate connection between supporting international aid and preventing conflict abroad; reflects on the benefits to UK security of promoting stability abroad; notes that ODA investment is an essential tool in tackling poverty, promoting stability, and reducing the causes of conflict and migration, all of which serve the UK's own security interests; further regrets that this cut represents the lowest UK aid contribution as a percentage of GNI since 1999, diminishing the UK's long-standing reputation as a global leader in humanitarian assistance and development; further notes with alarm that an increasing proportion of the UK's ODA is being spent on in-donor refugee costs rather than directly supporting poverty reduction, humanitarian aid, and sustainable development overseas; calls on the Government to reconsider this decision and explore alternative means to meet its defence spending commitments without cutting international aid; and urges Ministers to reaffirm the UK's commitment to global security and development, ensuring that national strength is not built at the cost of global responsibility.

for the people of Darfur and for greater accountability for those responsible for the atrocities; expresses deep concern over the ongoing humanitarian crisis in Darfur and wider Sudan where atrocities continue to be committed; urges the Government to prevent further genocidal acts in Darfur; further urges the Government to enhance peacekeeping efforts and provide aid to the region; and reaffirms the importance of preventing future genocides by ensuring justice, promoting human rights, and holding perpetrators of mass atrocities accountable for their actions.

That this House is deeply concerned by recent developments in the West Bank; believes that the deployment of Israeli military personnel to the West Bank, which constitutes one of the most significant military operations in the area since 2002, further escalates tensions and undermines the stability of the fragile ceasefires in the wider region; notes with alarm the expulsion of over 40,000 residents from the Jenin, Tulkarm and Nur Shams refugee camps; condemns remarks by those who advocate the annexation of the West Bank to Israel and who incite violence to achieve that end; further believes that such extremism undermines the efforts of those Israelis and Palestinians who are working towards peace; calls on the Government to legislate to cease the import to the UK of goods produced in illegal settlements; further notes the deteriorating humanitarian situation in the West Bank, with many displaced Palestinians struggling to access clean water, food, shelter and medical care; and further calls for the urgent delivery of aid to displaced Palestinians.

That this House recognises the Climate Change Committee (CCC)'s 7th carbon budget as a clear pathway to UK energy security, protecting families and businesses from volatile fossil fuel prices controlled by authoritarian regimes; is deeply concerned by the CCC's findings that the UK has deliverable plans for only a third of the emissions reductions needed to meet climate targets; understands that urgent action is required to expand domestic energy capacity; regrets that the former Conservative government cut the home insulation schemes established by the Liberal Democrats, which would have saved customers thousands and made homes warm and safe; is concerned by the Government's continued subsidies for the Drax biomass plant, airport expansion, and delays to the energy-saving benefits of Future Home Building Standards; calls for ambitious upfront investment in a ten-year emergency upgrade programme to provide free insulation and heat pumps for low-income households; urges the Government to introduce an energy social tariff to tackle fuel poverty and health inequalities caused by cold, damp homes; welcomes the CCC's recognition of nature's role in tackling climate change and strengthening communities against extreme weather; calls for urgent action on nature recovery, including

of residents and his instruction to prepare for a prolonged military presence; further condemns coordinated attacks by Israeli forces and settlers against Palestinian communities, including in Masafer Yatta and occupied East Jerusalem, where homes and structures have been set ablaze; recalls the International Court of Justice ruling in July 2024 that Israel's occupation of Palestinian territory is unlawful and that all states have a legal obligation not to aid or assist this illegal occupation and to act to bring it to an end; and urges the Government to take steps including a ban on all goods from illegal Israeli settlements and to end military cooperation and arms trade with Israel and all other trade that aids or assists Israel's unlawful occupation.

867 National oversight mechanismTabled: **27/02/25** Signatories: **12****Carla Denyer****Ellie Chowns****Kim Johnson****Rachael Maskell****Graham Leadbitter****Steve Witherden****Jim Shannon****Colum Eastwood****Chris Hinchliff****Shockat Adam**

That this House believes that the State owes it to bereaved families and victims to learn and implement lessons from deaths involving the State and corporate agencies; notes that the Grenfell Inquiry recognised a failure of the State to follow up on recommendations made by inquests and inquiries; acknowledges the Government's commitment to a publicly available record of these recommendations as a step in the right direction; urges the Government to also create a national oversight mechanism to ensure that these recommendations are routinely monitored by an independent body to help enact learning and prevent future deaths; further notes that such a Mechanism would go beyond facilitating transparency and ensure accountability, which is desperately needed for bereaved families and for public confidence; and believes that for victims of large scale tragedies such as Hillsborough and Grenfell, as well as victims of individual state failings, the Government must ensure that lessons are learned from their deaths and the same mistakes are not repeated.

That this House notes with concern that the new £25,000 cap on the Listed Places of Worship scheme has created significant financial difficulties for churches across the country that have building projects already in progress; believes that the sudden and unexpected introduction of the cap on January 22nd amounts to an unfair change of policy for places of worship that have already signed contracts; notes that the cap has put in jeopardy projects that are designed to restore important historic buildings and provide crucial community services, such as Holy Trinity Clapham which has raised £6.2m to expand its community services for the homeless and vulnerable, families and children but which now faces an extra £1m tax bill; recognises the scheme has received cross-party support across successive governments; and calls on the Government to ensure the introduction of an exemption for places of worship that already have signed contracts for projects set to conclude in the 2025-26 financial year, before the cap was introduced.

That this House expresses concern over the lack of broadband competition in many Persimmon homes estates, where residents are limited to the use of Fibrenest, a broadband provider which is owned entirely by the Persimmon Homes group; highlights that this practice prevents Persimmon homeowners from easily accessing alternative broadband providers and therefore limits consumer choice; notes that this forces consumers into a monopolistic arrangement at the mercy of a company that has full control over service standards and pricing; further notes that this practice has anti-competition, and market fairness implications, eliminating any incentive for service improvement; argues that Ofcom and the Competition and Markets Authority investigate this monopolistic and exploitative practice; and further argues that the Government legislates to ensure that residents of new build estates are allowed free and fair access to decide their own broadband arrangements.
